Best Practices

1. Log into CurrentCare as soon as you receive your User Name and Password; reset the password to one that you'll remember; you'll be prompted to change your password every 90 days.
2. Do not share your password with others or let others look up patient information while you are logged on to the Viewer.
3. Log out of the Viewer when you leave your work station; you will automatically be logged out after 15 minutes of inactivity.
4. In accordance with HIPAA training, and the RI Health Information act of 2008, you should access records only for the patients whom you'll be treating.
